Note! All illustrations are for illustrative purposes only and may not accurately depict the actual device. The items supplied with your phone might vary depending on the software and accessories available in your region or offered by your service provider. You can obtain additional accessories from your local Doro dealer. The supplied accessories provide the best performance with your phone.

Full user manual

For the full user manual please visit www.doro.co.uk/support/ or contact our Helpline.

1. GET STARTED

SIM card and battery

Remove the battery cover and the battery if it is already installed.

Be careful not to damage your fingernails when you remove the battery cover. Do not bend or twist the battery cover excessively as it may be damaged.

Charge the phone

Only use batteries, charger and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone's type approval and guarantee.

When the battery is running low, **I** is displayed and a warning signal is heard.

Connect the mains adapter to the wall socket and to the charging socket -

2. GET TO KNOW YOUR PHONE

Turn the phone on and off

- 1. Press and hold the red button **f** on the phone to turn it on/off. Confirm with Yes to power off.
- 2. If the SIM card is valid but protected with a PIN code (Personal Identification Number), PIN is displayed. Enter the PIN code and press OK. Delete with Clear.

Note! If PIN and PUK codes were not provided with your SIM card, please contact your service provider. Tip: It is recommended to remove the protective plastic film from the display to enhance the visibility

Attempts: # shows the number of PIN attempts left. When no more attempts remain, PIN blocked is displayed. The SIM card must now be unlocked with the PUK code (Personal Unblocking Key).

- 1. Enter the PUK code and confirm with **OK**.
- 2. Enter a new PIN code and confirm with **OK**.
- 3. Re-enter the new PIN code and confirm with OK.

Start-up wizard

When starting the telephone for the first time, you can use the start-up wizard to set some basic settings.

Tip: You can run the start-up wizard later if you want.

Step-by-step instructions

The arrow (→) indicates next action in step-by-step instructions. To confirm an action, press OK. To select an item, scroll or highlight the item using \frown / \frown and then press OK.

Enter text

- Press a numerical key repeatedly until the desired character is shown. Wait a few seconds before entering the next character.
- Press ***** for a list of special characters. Select the desired character with \bigcirc/\bigcirc and press OK to enter it.
- Use \Box/\Box to move the cursor within the text. Press # to cycle upper case, lower case and
- numerals
- Press and hold # to change writing language.

3. CALLS Make a call

- 1. Enter the phone number including the area
- code. Delete with Clear. 2. Press To dial. Press Abort to cancel
- dialling.
- 3. Press **f** to end the call.

Note! For international calls, always use + before the country code for best operation. Press 💥 twice for the international prefix +.

Make a call from the phonebook

- 1. Press Name to open the phonebook.
- 2. Use // to scroll through the phonebook, or quick search by pressing the key corresponding to the first letter of the name.
- 3. Press Call to dial the selected entry, or press Back to return to standby.

Receive a call

- 1. Press **mathematical** to answer, or press **Silent** to switch off the ring signal and then Reject to reject the call (busy signal). Alternately, press **f** to reject the call directly.
- 2. Press **f** to end the call.

Volume control

Use \bigcup / \bigcap to adjust the sound volume during a call. The volume level is indicated on the display. See also Audio setup in the full manual.

Silent

Silent is a fixed profile with keypad tone, message tone and ring tone disabled, while vibration, tasks and alarm are unchanged.

• Press and hold # to activate/deactivate silent.

Call options

During a call the soft keys () give access to additional functions.

Speed dial

Use A – B, O and 2 – 9 to speed dial an entry from standby.

• Press and hold the corresponding button to dial. Add speed dial numbers

- 1. Press Menu → Settings → Phonebook → Speed dial.
- 2. Select $\blacksquare \Rightarrow$ Add an select an entry from the phonebook.
- 3. Press OK to confirm.
- 4. Repeat to add speed dial entries for buttons **B**, 0,2-9

SOS calls

As long as the phone is switched on, it is always possible to place an SOS call by entering the main local emergency number for your present location followed by

Call log

Received, missed, and dialled calls are saved in a combined call log. 20 calls of each type can be stored in the log. For multiple calls related to the same number, only the most recent call is saved.

1. Press

2. Use // to scroll through the call log.

3. Press **r** to dial, or **Options**.

5. ICE (IN CASE OF EMERGENCY)

First responders can access important information such as medical information from the victim's phone ICE in case of emergency. In the event of a trauma, it is critical to have this information as early as possible to increase the chances of survival. All fields are optional, but the more information provided the better.

- 1. Press Menu **→** ICE.
- 2. Use \bigcup to scroll the list of entries.
- 3. Press Edit to add or edit information in each
- entry. Delete with Clear.
- 4. Press Save when done.
- See <u>Phonebook/ICE</u> in the full manual.

6. ASSISTANCE BUTTON

The assistance button allows easy access to contact your predefined help numbers should you need help. Make sure that the assistance function is activated before use. See the full manual on how to activate, how to enter recipients in the numbers list, and how to edit the text message.

Important!

Always inform recipients in the **Number list** that they are listed as your assistance contacts.

Make an assistance call

1. When help is needed, press and hold the assistance button for 3 seconds, or press it twice within 1 second. The assistance call begins after a delay of 5

seconds. In this time you can prevent a possible false alarm by pressing

- 2. An assistance text message (SMS) is sent to all recipients.
- 3. The first <u>recipient</u> in the list is dialled. If the call is not answered within 25 seconds, the next number is dialled. Dialling is repeated 3 times or until the call is answered, or until **f** pressed.

pre-set to handsfree mode. Do not hold the device

near your ear when the handsfree mode is in use,

Note! Some private security companies can accept automatic calls from their clients. Always contact

Alternatively press Menu

recipient manually and press Done.

the security company before using their phone

because the volume may be extremely loud.

See Assistance settings in the full manual.

Create and send text messages

3. Select a recipient from **Phonebook**.

4. Select Add to add more recipients.

5. When done, press Send.

When an assistance call is activated the phone is

number.

7. MESSAGES

message.

To.

2.

1. Press shortcut button (🖾).

Insert the SIM card

Insert the SIM card by gently sliding it into the holder. Make sure that the SIM card's contacts are facing inwards and that the cut off corner is pointing down. Take care not to scratch or bend the contacts on the SIM card. This device accepts micro SIM or 3FF SIM card.

Insert the battery

Insert the battery by sliding it into the battery compartment with the contacts facing downwards

cover.

to the right. Replace the battery

Keypad lock

You can lock the keypad to prevent the keys being accidentally pressed.

Press and hold 米 to lock/unlock the keypad.

Activate keylock

- 1. Press Menu
 Settings
 Security
 Keypad lock:
 - Auto keylock select the time delay for automatic keypad locking.
 - Unlock mode select Single key to unlock the keypad with ***** alternatively with **Dual key** to lock/unlock with right selection button (Name/Unlock) and *****.
- 2. Press OK to confirm.

4. PHONEBOOK

The Phonebook can store 100 entries with 3 phone numbers in each entry.

Add contact

- 1. Press Menu → Phonebook → -New contact- → Add.
- 2. Enter a <u> Name</u> for the contact, see <u>Enter text</u>. Delete with **Clear**.
- Use // to select Mobile, Home or Office, and enter the phone 3. number(s) including the area code.
- 4. When done, press Save.

8. BLUETOOTH®

You can connect wirelesses to other Bluetooth® compatible devices such as headsets or other phones.

Important!

When you are not using Bluetooth[®] connectivity, turn off Function on/off or Visibility. Do not pair with an unknown device.

Activate Bluetooth®

- 1. Press Menu → Settings → Bluetooth → Function on/off **→** On.
- 2. Press OK to confirm.

Visibility

- 1. Press Menu → Settings → Bluetooth →
- Visibility 🗲 On.
- 2. Press OK to confirm.

Search device

- 1. Press Menu
 Settings
 Bluetooth
 Search device
- 2. Select a device from the list and press Bond to connect. If Bluetooth[®] is not enabled, press Yes to activate.
- 3. Press OK to confirm.

9. SOUND & DISPLAY

Tone setup

- 1. Press Menu → Settings → Sound → Tone setup Ringtone.
- 2. Use // to select one of the available melodies, the melody will be played.
- 3. Press OK to confirm or Back to discard changes.

Text size

You can customise the text size for the menu and messages

- 1. Press Menu → Settings → Display → Text size: Normal / Large
- 2. Press OK to confirm.

Brightness

You can customise the brightness settings. The higher value, the better contrast.

1. Press Menu → Settings → Display → Brightness

• Level 1-3

2. Press OK to confirm.

10. ADDITIONAL FUNCTIONS

Alarm

- 1. Press Menu → Alarm → On. Enter the alarm time using the keypad and press 2.
- OK to confirm. • For a single occurrence, select Single.
 - For a repeated alarm, select Repeated. Scroll through the list of days and press On/Off to enable/disable the alarm for each day.
- 3. When done, press Save.
- 4. When the alarm goes off a signal will sound. Press Stop to turn off the alarm or press Snooze to repeat the alarm after 9 minutes.

Note! The alarm will work even when the phone is switched off. Do not press Yes to power on if wireless phone use is prohibited or when it may cause interference or danger.

Torch

1. Press Menu **→** Torch.

2. Select Off to turn off.

Tip: Press and hold shortcut button (to turn on the torch. Release to turn off.

11. TROUBLESHOOTING

Phone cannot be switched on		
Battery charge low	Connect the power adapter and charge the battery.	
Battery incorrectly installed	Check the installation of the battery.	
Failure to charge the battery		
Battery or charger damaged	Check the battery and charger.	
Battery recharged in tempera- tures < 0°C or > 40°C	Improve the charging environment.	
Charger incorrectly connected to phone or power socket	Check the charger connections.	
PIN code not accepted		
Wrong PIN code entered too many times	Enter the PUK code to change the PIN code, or contact the service provider.	
SIM card error		
SIM card damaged	Check the condition of the SIM card. If it is damaged, contact the service provider.	
SIM card incorrectly installed	Check the installation of the SIM card. Remove the card and reinstall it.	
SIM card dirty or damp	Wipe the contact surfaces of the SIM card with a clean cloth.	

12. SAFETY INSTRUCTIONS

🕂 WARNING The unit and the accessories can contain small parts. Keep all of the equipment out of the reach of small

children. The mains adapter is the disconnect device between the product and mains power. The mains socket outlet must be close to the equipment and easily accessible

Network services and costs

Your device is approved for use on the GSM 900/1800/1900 MHz networks. To use the device, you need a subscription with a service provider.

Using network services may result in traffic costs. Some product features require support from the network, and you may need to subscribe to them

Operating environment

Follow the rules and laws that apply wherever you are, and always turn off the unit whenever its use is prohibited or can cause interference or hazards. Only use the unit in its normal user position. Parts of the unit are magnetic. The unit can attract metal objects. Do not keep credit cards or other magnetic media near the unit. There is a risk that information stored on them can be erased

Medical units

The use of equipment that transmits radio signals, for example, mobile phones, can interfere with insufficiently protected medical equipment. Consult a doctor or the manufacturer of the equipment to determine if it has adequate protection against external radio signals, or if you have any questions. If notices have been put up at health care facilities instructing you to turn off the unit while you are there, you should comply. Hospitals and other health care facilities sometimes use equipment that can be sensitive to external radio signals.

Implanted medical devices

To avoid potential interference, manufacturers of implanted medical devices recommend a minimum separation of 15 cm between a wireless device and the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15 cm from the medical device.
- Not carry the wireless device in a breast pocket

 Hold the wireless device to the ear opposite the medical device. If you have any reason to suspect that interference is taking place, turn the phone off immediately. If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Areas with explosion risk

Always turn off the unit when you are in an area where there is a risk of explosion. Follow all signs and instructions. There is a risk of explosion in places that include areas where you are normally requested to turn off your car engine. In these areas, sparks can cause explosion or fire which can lead to personal injury or even death

Turn off the unit at filling stations, and any other place that has fuel pumps and auto repair facilities.

Follow the restrictions that apply to the use of radio equipment near places where fuel is stored and sold, chemical factories and places where blasting is in progress. Areas with risk for explosion are often – but not always – clearly marked. This also applies to below decks on ships; the transport or storage of chemicals; vehicles that use liquid fuel (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powder

Li-ion battery

This product contains a Li-ion battery. There is a risk of fire and burns if the battery pack is handled improperly.

🔨 WARNING

Danger of explosion if battery is incorrectly replaced. To reduce risk of fire or burns, do not disassemble, crush, puncture, short external contacts, expose to temperature above 60° C (140° F), or dispose of in fire or water. Recycle or dispose of used batteries according to the local regulations or reference guide supplied with your product.

Protect your hearing

WARNING Excessive exposure to loud sounds can cause hearing damage. Exposure to loud sounds while driving may distract your attention and cause an accident. Listen to a headset at a moderate level, and do not hold

the device near your ear when the loudspeaker is in use.

Emergency calls Important!

Mobile phones use radio signals, the mobile phone network, the terrestrial network and user-programmed functions. This means that connection cannot be guaranteed in all circumstances. Therefore, never rely only on a mobile phone for very important calls such as medical emergencies.

Vehicles

Radio signals can affect electronic systems in motor vehicles (for example, electronic fuel injection, ABS brakes, automatic cruise control, air bag systems) that have been incorrectly installed or are

manufactur

13. CARE AND MAINTENANCE

Your unit is a technically advanced product and should be treated with the greatest care. Negligence may void the warranty.

- Protect the unit from moisture. Rain/snowfall, moisture and all types of liquid can contain substances that corrode the electronic circuits. If the unit gets wet, you should remove the battery and allow the unit to dry completely before you replace it.
- Do not use or keep the unit in dusty, dirty environments. The unit's moving parts and electronic components can be damaged.
- Do not keep the unit in warm places. High temperatures can reduce the lifespan for electronic equipment, damage batteries and distort or melt certain plastics.
- Do not keep the unit in cold places. When the unit warms up to normal temperature, condensation can form on the inside which can damage the electronic circuits
- Do not try to open the unit in any other way than that which is indicated here
- Do not drop the unit. Do not knock or shake it either. If it is treated roughly the circuits and precision mechanics can be broken.
- · Do not use strong chemicals to clean the unit.

The advice above applies to the unit, battery, mains adapter and other accessories. If the phone is not working as it should, please contact the place of purchase for service. Don't forget the receipt or a copy of the invoice.

14. WARRANTY

This product is guaranteed for a period of 12 months from the date of purchase. In the unlikely event of a fault occurring during this period, please contact the place of purchase. Proof of purchase is required for any service or support needed during the guarantee period.

This guarantee will not apply to a fault caused by an accident or a similar incident or damage, liquid ingress, negligence, abnormal

usage, non-maintenance or any other circumstances on the user's part. Furthermore, this guarantee will not apply to any fault caused by a thunderstorm or any other voltage fluctuations. As a matter of precaution, we recommend disconnecting the charger during a thunderstorm

Batteries are consumables and are not included in any guarantee. This guarantee does not apply if batteries other than DORO original batteries are used.

Hearing aid compatibility

Note! For hearing aid compatibility, turn off Bluetooth connectivity.

This phone is hearing aid compatible. Hearing aid compatibility is not a guarantee that a specific hearing aid will work with a specific phone. Mobile phones contain radio transmitters that may interfere with hearing aid performance. This phone has been tested for use with hearing aids, for some of the wireless technologies that it uses, but there may be some newer wireless technologies that have not been tested yet for use with hearing aids. To ensure that a specific hearing aid works well with this phone, test them together before making a purchase.

The standard for hearing aid compatibility contains two types of ratings:

• M: To use your hearing aid in this mode, make sure that your hearing aid is set to "M-mode" or acoustic coupling mode, and position the phones receiver near the hearing aid's built-in microphone. For the best results, try using the phone in different positions relative to your hearing aid-for example, placing the receiver slightly above the ear may result in better performance for hearing aids with microphones positioned behind the ear.

• T: To use your hearing aid in this mode, make sure that your hearing aid is set to "Tmode" or telecoil coupling mode (not all hearing aids have this mode). For the best results, try using the phone in different positions relative to your hearing aid-for example, placing the receiver slightly below or in front of the ear may result in better performance.

Your device meets the T4/M3 level rating

Specific Absorption Rate (SAR)

This device meets applicable international safety requirements for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines from the independent scientific organization ICNIRP (International Commission of Non-Ionizing Radiation Protection).

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg averaged over 10 grams of tissue and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for this device model are:

During normal use, the SAR values for this device are usually well

below the values stated above. This is because, for purposes of system efficiency and to minimize interference on the network, the

output power of your mobile device is automatically decreased

when full power is not needed for the call. The lower the power

sentative for more information about your vehicle or any additional equipment.

Do not keep or transport flammable liquids, gases or explosives together with the unit or its accessories.

For vehicles equipped with air bags: Remember that air bags fill with air with considerable force. Do not place objects, including fixed or portable radio equipment in the area above the airbag or the area where it might expand. Serious injuries may be caused if the mobile phone equipment is incorrectly installed and the airbag fills with air.

It is prohibited to use the unit in flight. Turn off the unit before you board a plane. Using wireless telecom units inside a plane can pose risks to air safety and interfere with telecommunications. It may also be illegal.

Specifications

(Applicable in countries with separate collection systems)

The marking on the battery, manual or packaging indicates that the battery in this product should not be disposed of with other household waste. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment. To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system

Declaration of Conformity

Doro hereby declares that Doro 5030 conforms to the essential requirements and other relevant regulations contained in the Directives 1999/5/EC (R&TTE) and 2011/65/EU (RoHS). A copy of the Declaration of Conformity is available at www.doro.com/dofo
