1. GET STARTED

When you first get your phone, there is a few actions that you need to take before starting to use it.

Tip: Remove the plastic screen protector.

1.1. Unbox your new phone

The first step is to unbox the phone and assess the items included in the packaging. Make sure to read through the manual so you can familiarize yourself with the equipment and the basic functions.

• The items supplied with the device and any available accessories may vary depending on the region or service provider.
• The supplied items are designed only for this device and may not be compatible with other devices.
• Appearances and specifications are subject to change without prior notice.
• You can purchase additional accessories from your local Doro retailer.
• Make sure they are compatible with the device before purchase.

1.2. Charge

While it's possible that your phone will already come with enough power charged to power your phone, we recommend to give it a full charge before first use.

• Only use batteries, chargers and accessories that have been approved for use with this particular model.
• Connecting other accessories may be dangerous and may invalidate the phone's type approval and warranty.

1.3. Save energy

When the battery is fully charged, disconnect the charger from the device and unplug the charger from the wall outlet.

To save power, the screen goes off after a while. Press any button to wake up the screen. Batteries degrade over time, which means that call time and standby time will normally decrease with regular use. During extended operation, the device may feel warm. This is normal. To avoid getting too warm, the device may switch off during charging.

1.4. Turn the phone on and off

• Press and hold (2) to turn on and off.
• If the SIM card is valid but protected with a PIN code (Personal Identification Number), PIN appears. Enter the PIN code and press OK. Delete with Clear.

Note! If PIN and PUK codes were not provided with your phone, press repeatedly until desired character is shown.

2. SOFTWARE

2.1. Descriptions in this document

Descriptions in this document are based on your phone's setup at the time of purchase. Instructions normally start from the start screen. Press to reach the start screen. Some descriptions are simplified.

The arrow indicates next action in step-by-step instructions.

2.2. Handle the phone

Call:
• Dialed a number or answer an incoming call.
• Enter the call leg.
End call/Power on and off:
• End calls or return to the start screen.
• Long press to power on or off.
Assistance (0): Press to make an assistance call.
Back: Press to return to the previous screen.
Camera:
• Press to initiate the camera app.

3. QUICK SETTING

3.1. Get to know your phone

Start-up wizard
• Press to open Contacts.
• Use to scroll through the contacts, or press the button corresponding to the first letter of the name to quickly search.
• Press to dial the selected entry, or press to return to start screen.
• Press to add a new contact.
• Press to dial the highlighted number.
• Press to enter the new contact.

2.3. Quick settings
• Press to open Settings, press , to select Torch, Wi-Fi, Cellular Data, Bluetooth or Vibration.

Note! The torch drains the battery very quickly. Remember to turn off the torch after you are done using it.

2.4. Enter text with predictive text:

For fast and accurate typing, you can use the intelligent text input method.

• 1. While testing, press to select input method.
• 2. Press to cycle upper case, lower case and numerals.

Change the writing language:
• Press and hold for a list of available languages.
• Select language with , and press OK to confirm.

3. CALLS

3.1. Make a call

• Enter the phone number.
• Press to call.
• Press to end the call.

Note! There is no dial tone. As long as the phone is turned on, it is ready for use.

3.2. Make a call from the contacts list

• Press to open Contacts.
• Use to scroll through the contacts, or press the button corresponding to the first letter of the name to quickly search.
• Press to dial the selected entry, or press to return to start screen.
• Press to add a new contact.
• Press to add a new contact.

3.3. Receive a call

• To answer an incoming call when the phone is closed, open the phone.
• Press to accept the call.

4. MESSAGES

4.1. Create a message

Create, edit and read messages.

A text message will be converted to a written message automatically when multimedia files (music, video, etc.) are attached.

• Press to send a message.
• Press to enter the phone number.
• Press or to take a picture.

5. SOS/112 CALLS

As soon as the phone is switched on, it is always possible to place a SOS call by entering the main local emergency number for your present location followed by the number for the nearest hospital. Some networks accept calls to emergency numbers without a valid SIM card. Contact your service provider for more information.

Note! Sometimes an emergency call cannot be placed due to network, environment or interference issues.

6. ASSISTANCE BUTTON

The Assistance button on the back of the phone allows easy access to contact your predefined help numbers should you need help. Make sure that the assistance function is activated before use. See the full manual on how to activate, how to enter recipients in the numbers list, and how to edit the text message.

7. CAMERA

Note! To get sharp photos, wipe the lens clean with a dry cloth.

• Press the shortcut button or, press Camera.
• Press or OK to take a photo.

8. MESSAGES

8.1. Create a message

Create, edit and read messages. A text message will be converted to a written message automatically when multimedia files (music, video, etc.) are attached.

• Press to send a message.
• Press to enter the phone number.
• Press or to take a photo.

9. WI-FI CONNECTION

You need an internet connection to use the Internet and the e-mail features. To reduce data traffic costs, it is recommended to use Wi-Fi whenever available, instead of using the more costly Mobile Data Connection. Contact your service provider for details on data usage costs before activating.

You may already have Wi-Fi in your home and it’s often available at workplaces. Take advantage of free networks in coffee shops, hotels, trains and libraries. Connecting to the Internet with Wi-Fi doesn’t incur additional data traffic costs, unless you have to pay to get on the wireless network.

• Press to select Wi-Fi.
• Press to select your Wi-Fi network.

Select Connect in Internet.
• Select Available Networks and select the network you want to connect to.

4. If the network is secured with a password, enter the password and select Connect.

Tip: is shown in the status bar when connected.
You can easily turn on and off Wi-Fi from the Quick settings:
• From the start screen, press .

Note! Keep in mind that your phone remembers Wi-Fi networks you connect to. If Wi-Fi is turned on, the phone automatically connects to the network next time you are within reach. Some open networks require you to log in to a webpage before gaining access to the network.
10. INTERNET
Use the web browser to access the Internet.
1. Press ﬂop. 
2. To access your available sites or arrows to Search.
10.1. Email
Email accounts, like Gmail and Yahoo may require that you log-in to the account settings before you can access your e-mail on your new Doro phone. To avoid problems signing in from your phone, you may need to log-into your Gmail or Yahoo account from a computer first.
Press ﬂop.
10.2. Gmail & Yahoo Mail: 
1. Use the web browser to log-in to your Gmail/Yahoo account.
2. Click your name (top right corner)  Your Account  [Under “Personal Information (click to access sites)  Account security]  Allow less secure apps  Set the switch to On. 
3. Log-in with your old account again.
11. CUSTOM SETTINGS
11.1. Silence the ringtones
Use Silent to silence the ringtones. Change settings for various sounds on the device.
Press and hold  to activate/deactivate silent.
12. Change ringtones
2. Use to , to scroll between options. When you hear the ringer you wish to use, press to select.
3. Once you have found the ringer you wish to use, press to select.
11.3. Configure the audio setup
3. Bluetooth
Bluetooth technology for hands free use. Connect your mobile to other Bluetooth compatible devices such as headsets.
On the start screen, press  Settings  Personalization. 
12.1. Calculator
Use the calculator to perform basic math operations.
Create note and reminders.
File manager: Copy, delete, rename, move or add various files stored in the phone or in the memory card.
13. MFM RADIO
Listen to FM radio which has a frequency range from 87.5 MHz to 108 MHz. The FM radio needs to connect a compatible headband that works as antenna.
14. ALARM
Set alarms for times you shouldn’t miss.
Note: The alarm will not work when the phone is turned off.
15. ORGANIZER
On the start screen, press  Organizer. 
15.1. Calendar:
View your upcoming tasks and events.
15.2. Perform: Make basic math operations.
15.3. Manage: Copy, delete, rename, move or add various files stored in the phone or in the memory card.
16. MEDIA
16.2. Use the music player to listen to music or other audio files.
Video: Record, store and view videos.
Recorder: Record and store voice recordings.
Gallery: Camera taken with the camera and other saved images or downloaded.
17. Help
To get help:
Download the full manual at www.doros.com
Up-date your phone’s software.
Your phone checks for available software updates automatically. Please follow the on-screen instructions when you are notified of a software update.
Tip: Always download and install phone software updates immediately.
18. SAFETY INSTRUCTIONS
WARNING
To prevent possible harm to the environment or human health.
18.1. Network services and costs
When you access the internet via Wi-Fi or 3G/4G, you need to pay for each service you use.
18.2. Using the music player
Use the music player to listen to music or other audio files.
18.3. Music
roads. Use caution when crossing streets.
18.4. Using the calculator
Use the calculator to perform basic math operations.
18.5. Battery
To prevent possible harm to the environment or human health.
18.6. Always keep the wireless device more than 15 cm from the device.
18.7. Use only the wireless device in a breast pocket.
18.8. Hold the wireless device to the ear opposite the medical device.
19.1. lithium ion battery
There is a risk of fire if the battery pack is handled improperly.
WARNING
19.2. If the battery is incorrectly replaced.
This device meets applicable international safety requirements for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed to not exceed the limits for exposure to radiofrequency (RF) energy which is recognized as safe by authorities such as the Federal Communications Commission (FCC) of the United States, the National Council on Radiation Protection and Measurements (NCRP), and the World Health Organization (WHO). The SAR limit for mobile devices is 2.0 W/kg averaged over 10 grams of body tissue, as prescribed by the International Commission on Non-Ionizing Radiation Protection (ICNIRP). This device has a SAR of 1.24 W/kg, which is well below the limit. The SAR value was measured using standard operating positions with the antenna transmitting at its highest certified power level in all frequency bands. The highest SAR values for this device are 6.10 W/kg (for the head) and 2.04 W/kg (for the body). The SAR value is calculated in accordance with the requirements of the ICNIRP. 19.3. Bluetooth
Bluetooth devices are RF devices that transmit radio signals, for example, mobile phones, can interfere with suitably protected medical devices. Consult a doctor or manufacturer of the equipment to determine if it has adequate protection against external radio signals, or if you have any questions. If improved health care facilities sometimes require communication from the health care professional, consult your health care provider.
Areas with explosion risk
Avoid using the mobile phone in an area where there is a risk of explosion. Follow all signs and instructions. There is a risk of explosion in areas where blasting operations are in progress, and where flammable or explosive gases or dust are present. Only use the mobile phone in the area if explosion is unlikely.
19.4. The equipment should be disconnected from the mains before service.
19.5. Implantable medical devices
To prevent possible harm to the environment or human health.
19.6. Lithium ion battery
There is a risk of fire if the battery pack is handled improperly.
WARNING
19.7. If the battery is incorrectly replaced.
